# Volume contents

**Vol. 14, Nos. 1–3**

**The Thymus. Histophysiology and Dynamics in the Immune System**
**Guest Editors: Jan Rozing and Henk-Jan Schuurman**

Editorial
J. Rozing & H.-J. Schuurman 1

Thymus-derived and non-thymus-derived T-like cells: The origin and function of cells bearing γ-δ receptors
E.B. Bell 3

Sequential activity of γ-δ T-cell receptor bearing lymphocytes, specific T-cell factors, and α-β T-cell receptor bearing T cells: A hypothesis
R.A. de Weger, H. van Loveren, R.J. Vandebriel, H.K. Parmentier 19

Localization and phenotype of CD3 associated gamma/delta receptor expressing intestinal intraepithelial lymphocytes
B. de Geus, M. van den Enden, C. Coolen & J. Rozing 31

Expression of activation antigens on thymocytes in the 'common thymocyte' stage of differentiation
H.-J. Schuurman, D. van Wichen & R.A. de Weger 43

The mouse T-lymphocyte-activating molecule THAM is associated to ECTO-aminopeptidase activity
I. Vivier, Ph. Naquet, J.-P. Gorvel, A. Rigal & M. Pierres 55

Reversible thymic collapse following acute stress is beneficial: A hypothesis
M. Aronson 61

Histological changes in the thymus during mouse pregnancy
A.G. Clarke & M.D. Kendall 65

Organotin-induced thymus atrophy concerns the OX-44$^+$ immature thymocytes. *Relation to the interaction between early thymocytes and thymic epithelial cells?*
R.H.H. Pieters, J. Kampinga, M. Bol-Schoenmakers, B.W. Lam, A.H. Penninks & W. Seinen 79

Thymus histopathology in mice transgenic for *c-fos* and *Ha-ras*
B. Kyewski & U. Rüther 89

Antigens shared by thymic stromal cells and T lymphocytes are abnormally expressed in AKR thymuses
C.L. Tuček, R.L. Boyd & H. Hiai 95

Radiation Leukemia Virus: A marker for the study of intrathymic T cell differentiation
J. Boniver, C. Delvenne, M. Janowski, R. Courtoy & M.P. Defresne 109

Transient depletion of cortical thymocytes induced by chicken anaemia agent
S.H.M. Jeurissen J.M.A. Pol & G.F. de Boer 115

Defects in the thymic epithelial stroma of diabetes prone BB rats
J. Rozing, C. Coolen, F.J. Tielen, J. Weegenaar, H.-J. Schuurman, D.L. Greiner & A.A. Rossini 125

Evidence for normal thymic export of lymphocytes and an intact $RT6^a$ gene in RT6 deficient diabetes prone BB-rats
H.-G. Thiele, F. Koch, F. Haag & W. Wurst 137

Peripheral T cells in diabetes prone (DP) BB rats are CD45R-negative
H. Groen, J.M.M.M. van der Berk, P. Nieuwenhuis & J. Kampinga 145

Cyclosporine A prevents the generation of single positive mature T cells in newborn mice
K. Heeg, S. Bendigs, G. Häcker & H. Wagner 151

Perturbation of T-cell differentiation in lethally irradiated rats reconstituted with syngenic bone marrow and treated with cyclosporin-A
G.M.J. Bos, G.D. Majoor & P.J.C. van Breda Vriesman 155

Fetal thymic differentiation in Down's syndrome
A. Cossarizza, D. Monti, G. Montagnani, A. Forabosco, F. Dagna-Bricarelli & C. Franceschi 163

Acetylcholine receptor epitope in proteins of myasthenia gravis-associated thymomas and on-thymic tissues
A. Marx, R. O'Connor, S. Tzartos, I. Kalies, T. Kirchner & H.-K. Müller-Hermelink 171

The gene of the α-subunit of the acetylcholine receptor: Molecular organisation and transcription in myasthenia-associated thymomas
K.I. Geuder, R. Schoepfer, T. Kirchner, A. Marx & H.-K. Müller-Hermelink 179

B- and T-cell activation in the thymus of patients with Myasthena Gravis
S. Cohen-Kaminsky, C. Leprince, P. Galanaud, Y. Richards & S. Berrih-Aknin 187

Evaluation of prognostic features in thymic epithelial tumors
T. Kirchner, B. Schalke, A. Marx & H.-K. Müller-Hermelink 195

**Vol. 14, No. 4,**

Interaction between immune and endocrine systems: Effect of luteotrophic hormone (LH) and thymic hormone on surface antigens (Thy1-2, Lyt1 and Lyt2) expresion
M. Rouabhia, J. Chakir, O. Othmane & P.A. Deschaux 205

The effect of cyclosporine on murine thymic epithelial cells – an immunohistochemical study
C. Hiramine, K. Hojo, M. Koseto & M. Itoh 213

Pregnancy-related involution of the thymus in the viviparous lizard, *Chalcides ocellatus*
A.H. Saad 223

Prepubertal rat thymus secretes a factor that modulates gonadotrpoin secretion in cultured rat pituitary cells
M.E. Mendoza & M.C. Romano 233

The preferential binding of immature thymocytes to a rat thymic epithelial cell line
D. Lupin, H. Iwaki, A. Masuda, M. Imamura & T. Uede 243

*Letters to the Editor*

Biopsy of the thymus in patients with acquired immunodeficiency syndrome
F. Di Sabato, G. Capuano Loreto & V. D'Andrea 261

Lymphocyte content in the aging human thymus
Z. Vraneš, D. Varga, I. Vučak, I. Jelič & M. Marušić 265

Volume contents 267
